RF433 Range Extender Add-on Device Quickstart Guide

Model No. RFR1330

What's inside:

1x RF433 Range Extender

1x Power Adapter*

* Power adapter image in this guide is for reference only, please refer to actual power adapter plug in the package.

All Home8 add-on devices have to work with Home8 systems.

Step 1: Assemble your device and accessories

1. Unpack your device and accessories.
2. Connect the included power adapter to the RF433 Range Extender.

Step 2: Place the device

You don't have to add the RF433 Ranger Extender into your Home8 system. It is suggested to place the RF433 Range Extender between the device and Security Shuttle where the connection is bad. The Extender needs to be placed within 50 ft (15 meters) from your Security Shuttle. The performance may be affected by environmental factors such as walls, metal radio jamming and more.
