What’s inside:

1x Security Shuttle
2x Wi-Fi Cameras
1x External Siren

1x Power Adapter
1x Ethernet Cable
1x 16GB USB Thumbdrive

2x Door + Window Sensors
1x Infrared Motion Sensor
2x Keychain Remote

4x Double-Sided Tapes
2x Batteries (CR123A)

6x Mounting Accessories
1 x Double-Sided Tape

2x Power Adapters
2x Extension Cables

16x Mounting Accessories

1x Power Adapter
1x Battery (CR123A)

Broadband internet connection, iOS or Android phone and home router required.
Fase 1 - Montaggio dell'hardware

Disimballare l'hardware a meno di 3 m dal router domestico.

• Collegare la navetta di sicurezza al router compatibile DHCP con il Ethernet in dotazione
• Collegare la navetta di sicurezza e la telecamera Wi-Fi agli alimentatori e collegare questi ultimi alla rete elettrica
• Installare le batterie sui sensori porta + finestra e di movimento

Passaggio successivo:

• Collegare lo smartphone alla rete Wi-Fi domestica
• Scaricare la app Home8 da App Store o Google Play
• Seguire le istruzioni sullo schermo e configurare l'account

Fase 2 - Configurazione dello smartphone

La procedura verrà interrotta se lo smartphone risulta inattivo. Perciò, prima di registrare i dispositivi, disattivare la funzione di blocco automatico sullo smartphone. Sarà possibile riattivarla una volta configurato il sistema.
Fase 3 - Montaggio dei dispositivi

Prima di montare i sensori, verificare che siano a portata della navetta di sicurezza.

• Portare i sensori nelle stanze in cui dovranno essere utilizzati
• Aprire il vano batterie di ciascun dispositivo da installare

Se si riceve una notifica di manomissione del dispositivo, allora è a portata.
Rimettere in sede il coperchio del vano batterie e montare il dispositivo con le viti o il nastro biadesivo in dotazione.

Prima di montare le telecamere

• Portarle nelle stanze in cui dovranno essere utilizzate e collegarle alla rete elettrica
• Attendere che le telecamere si connettano

Se il segnale video è visibile, collocare e utilizzare liberamente le telecamere
Can I save the video(s) recorded on the flash drive to my PC?
Yes! You can take the USB flash drive from the Security Shuttle and plug it directly to your PC and access the recorded video. (Remember to plug the USB flash drive back into the Security Shuttle when finished.)

How do I retrieve my Home8 Mobile App password?
While we cannot email you the existing account password, you may request for a new password by going to the Home8 App login page, and tap the “Forgot password?” link and then go through the steps to request a randomly generated password to be sent to your registered email. (Password can be changed by tapping on the Sidebar Menu button on the app Main Menu, and then tap “My Profile”)

How can I be certain other people are not stealing my identity on the cloud?
We take your security seriously. There are two levels of security steps we provide to ensure your data are secured. First, it is required all users to go through an authentication process with encrypted transmission during sign-in. Secondly, after the authentication process, everything is encrypted via the internet; Home8 App uses bank-level AES data encryption.

How can I be sure unauthorized people are unable to look at my videos on the cloud?
With your privacy in mind, we store your videos locally. Event-triggered video recordings are stored on your local flash drive plugged in your Security Shuttle USB port, and for the live video clips manually recorded, they are stored on your smart device.

How many locations can I manage from my Home8 App?
Home8 App is built to support multi-location management. You can manage as many locations as you would like, and we do not place a limit on the number of Home8 Systems you can purchase.
**If I lose my smartphone, what should I do?**

We recommend you to change your password as soon as possible by using any of the following methods to sign in to your account to make the change to the password:
- Use a smart device with Home8 App installed.
- Visit https://web.home8systems.com on a web browser.
Alternatively, you may also contact us to disable your account for you.

**Is there a place I can view the user manual online?**

Yes, visit www.home8systems.com, and then access user manuals.

**What are the requirements prior to purchasing an Home8 System?**

Because Home8 System is a fully IoT interactive system, it will require the following:
- Broadband Internet connection (dial-up connections are not supported)
- Internet Router with an available LAN port.
- Smartphone with a Data Plan (for using the App features such as push notification, and video streaming)

**What can I do if a camera is offline?**

If a camera is showing as “offline”, try power cycle on the camera first and wait approximately two minutes, if the offline situation persists, try moving the camera closer to the Security Shuttle and power cycle the device again. After tried the methods above, if the offline status is still not resolved, please contact our Technical Support for further troubleshooting assistance.

**What can I do if my system is offline?**

First, try checking your internet connection, if the connection is working properly, then unplug the network cable from your Security Shuttle for 10 seconds, and then reconnect it. If the Security Shuttle is still offline after 5 minutes, please contact our Technical Support for further troubleshooting assistance.
Troubleshooting Tips

Are your devices listed in your app?
If you’re having trouble installing your devices, see if they’re listed in your Home8 app:
• Navigate to ☰ > Device Management to see if all your devices are listed
• Tap + next to the device category and follow the on-screen instructions to add any missing devices

Are your devices communicating with Security Shuttle?
• If your devices don’t connect to Security Shuttle, they might be too far away. Take them to a location that’s closer to Security Shuttle and try again.
• If they do connect, you’ll know the range of your device and where to install a range extender.
• Alternatively, you can move Security Shuttle closer to your device.
• If your devices still don’t communicate with Security Shuttle, even when they’re in the same room, navigate to ☰ > Device Management > + on the Home8 app to add your devices again.

Do you need to reset your camera?
If your camera isn’t communicating with Security Shuttle, your app may ask you to reset your camera.
• Push and hold the reset button locate on the backside of the camera over 5 seconds
• Return to the app and follow the onscreen instructions
