What’s inside:

1x Security Shuttle

2x Wi-Fi Cameras

1x External Siren

1x Power Adapter

1x Ethernet Cable

1x 16GB USB Thumbdrive

2x Power Adapters

2x Extension Cables

16x Mounting Accessories

6x Mounting Accessories

1 x Double-Sided Tape

2x Door + Window Sensors

1x Infrared Motion Sensor

2x Keychain Remote

4x Double-Sided Tapes

1x Double-Sided Tape

2x Batteries (CR123A)

1x Battery (CR123A)

Broadband internet connection, iOS or Android phone and home router required.
Stap 1: Installatie

Zorg dat u toegang heeft tot uw router (max. 3 meter afstand).

- Verbind de Centrale module met uw (DHCP-) router met behulp van de ethernet-netwerkkabel.
- Verbind de Centrale module en de Wifi-camera's met de netstroomadapters en sluit deze aan op het stopcontact.
- Plaats de batterijen in de deur-, raam- en bewegingssensors

Stap 2: Uw Smartphone instellen

Uw smartphone mag gedurende de installatie niet in slaapstand gaan. Zorg er dus voor dat de automatische slaapstand op uw telefoon uitgeschakeld is. U kunt dit na de installatie weer inschakelen.

Volgende:

- Verbind uw telefoon met uw draadloze netwerk
- Download de Home8 app bij de App store of bij Google Play
- Volg de instructies op het scherm en creëer uw account
Step 3: Monteer de sensors en camera's

Voordat u de sensors vast monteert, let er alstublieft op dat de sensors worden herkend door de Centrale module.

- Breng de sensors in de ruimte waar u deze wilt gebruiken
- Open het batterijvak van het apparaat dat u wilt installeren

Als u een melding krijgt dat de sensor een signaal detecteert is de sensor binnen het bereik van de Centrale module. Sluit het batterijvak en monteer het apparaat met de bijgevoegde schroeven of met dubbelzijdig kleefband.

Voordat u de camera's monteert

- Breng de camera's naar de ruimte waar u deze wilt gebruiken
- Wacht totdat de camera's zich hebben verbonden met de centrale module

Zodra u beeld ziet kunt u de camera vast monteren.
Can I save the video(s) recorded on the flash drive to my PC?
Yes! You can take the USB flash drive from the Security Shuttle and plug it directly to your PC and access the recorded video. (Remember to plug the USB flash drive back into the Security Shuttle when finished.)

How do I retrieve my Home8 Mobile App password?
While we cannot email you the existing account password, you may request for a new password by going to the Home8 App login page, and tap the “Forgot password?” link and then go through the steps to request a randomly generated password to be sent to your registered email. (Password can be changed by tapping on the Sidebar Menu button on the app Main Menu, and then tap “My Profile”)

How can I be certain other people are not stealing my identity on the cloud?
We take your security seriously. There are two levels of security steps we provide to ensure your data are secured. First, it is required all users to go through an authentication process with encrypted transmission during sign-in. Secondly, after the authentication process, everything is encrypted via the internet; Home8 App uses bank-level AES data encryption.

How can I be sure unauthorized people are unable to look at my videos on the cloud?
With your privacy in mind, we store your videos locally. Event-triggered video recordings are stored on your local flash drive plugged in your Security Shuttle USB port, and for the live video clips manually recorded, they are stored on your smart device.

How many locations can I manage from my Home8 App?
Home8 App is built to support multi-location management. You can manage as many locations as you would like, and we do not place a limit on the number of Home8 Systems you can purchase.
If I lose my smartphone, what should I do?

We recommend you to change your password as soon as possible by using any of the following methods to sign in to your account to make the change to the password:
- Use a smart device with Home8 App installed.
- Visit https://web.home8systems.com on a web browser.
Alternatively, you may also contact us to disable your account for you.

Is there a place I can view the user manual online?

Yes, visit www.home8systems.com, and then access user manuals.

What are the requirements prior to purchasing an Home8 System?

Because Home8 System is a fully IoT interactive system, it will require the following:
- Broadband Internet connection (dial-up connections are not supported)
- Internet Router with an available LAN port.
- Smartphone with a Data Plan (for using the App features such as push notification, and video streaming)

What can I do if a camera is offline?

If a camera is showing as “offline”, try power cycle on the camera first and wait approximately two minutes, if the offline situation persists, try moving the camera closer to the Security Shuttle and power cycle the device again. After tried the methods above, if the offline status is still not resolved, please contact our Technical Support for further troubleshooting assistance.

What can I do if my system is offline?

First, try checking your internet connection, if the connection is working properly, then unplug the network cable from your Security Shuttle for 10 seconds, and then reconnect it. If the Security Shuttle is still offline after 5 minutes, please contact our Technical Support for further troubleshooting assistance.
**Troubleshooting Tips**

**Are your devices listed in your app?**
If you’re having trouble installing your devices, see if they’re listed in your Home8 app:
- Navigate to ☐ > **Device Management** to see if all your devices are listed
- Tap + next to the device category and follow the on-screen instructions to add any missing devices

**Are your devices communicating with Security Shuttle?**
- If your devices don’t connect to Security Shuttle, they might be too far away. Take them to a location that’s closer to Security Shuttle and try again.
- If they do connect, you’ll know the range of your device and where to install a range extender.
- Alternatively, you can move Security Shuttle closer to your device.
- If your devices still don’t communicate with Security Shuttle, even when they’re in the same room, navigate to ☐ > Device Management > + on the Home8 app to add your devices again.

**Do you need to reset your camera?**
If your camera isn’t communicating with Security Shuttle, your app may ask you to reset your camera.
- Push and hold the reset button locate on the backside of the camera over 5 seconds
- Return to the app and follow the on-screen instructions
